

e-Governance Academy

www.ega.ee

electronic democracy +
electronic government =
e-governance

Balanced e-Governance

Combination of electronic services and participatory services

e- GOVERNMENT

Transaction of user-oriented services offered by government that are based on information and communication technologies.

e-DEMOCRACY

Digitally conveyed information (transparency) and the political influence (participation) exerted by citizens and business on the opinion-forming processes of public – state and non-state –institutions

eGovernment example:

Parental benefit – best eGov service in 2004 (interoperability of 5 information systems from 5 government institutions)

Tax declarations on-line

Organization

Legal
framework

Fiscal
framework

Technical
architecture

eGovernment Policy / Strategy

Legislation

- **Databases Act (1997/ 2006)**
- **Public Information Act (2001)**
- **Digital Signatures Act (2000)**
- **Act on Intellectual Property** (applicable also for state databases)
- **Principles of Estonian Information Policy (1998, 2004)**
- **Action Plan of Estonian Information Policy – (eEstonia) (1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006...)**
- **Personal Data Protection Act (1996)**

Example: info-political principles in Estonia

- Citizen (customer) orientation
- Leading role for the private sector
- Efficient and transparent public sector. eDemocracy and participation.
- Functioning model for protection of personal data
- Measures against digital divide (ID-cards example...)
- Neutrality concerning technological platforms
- etc.

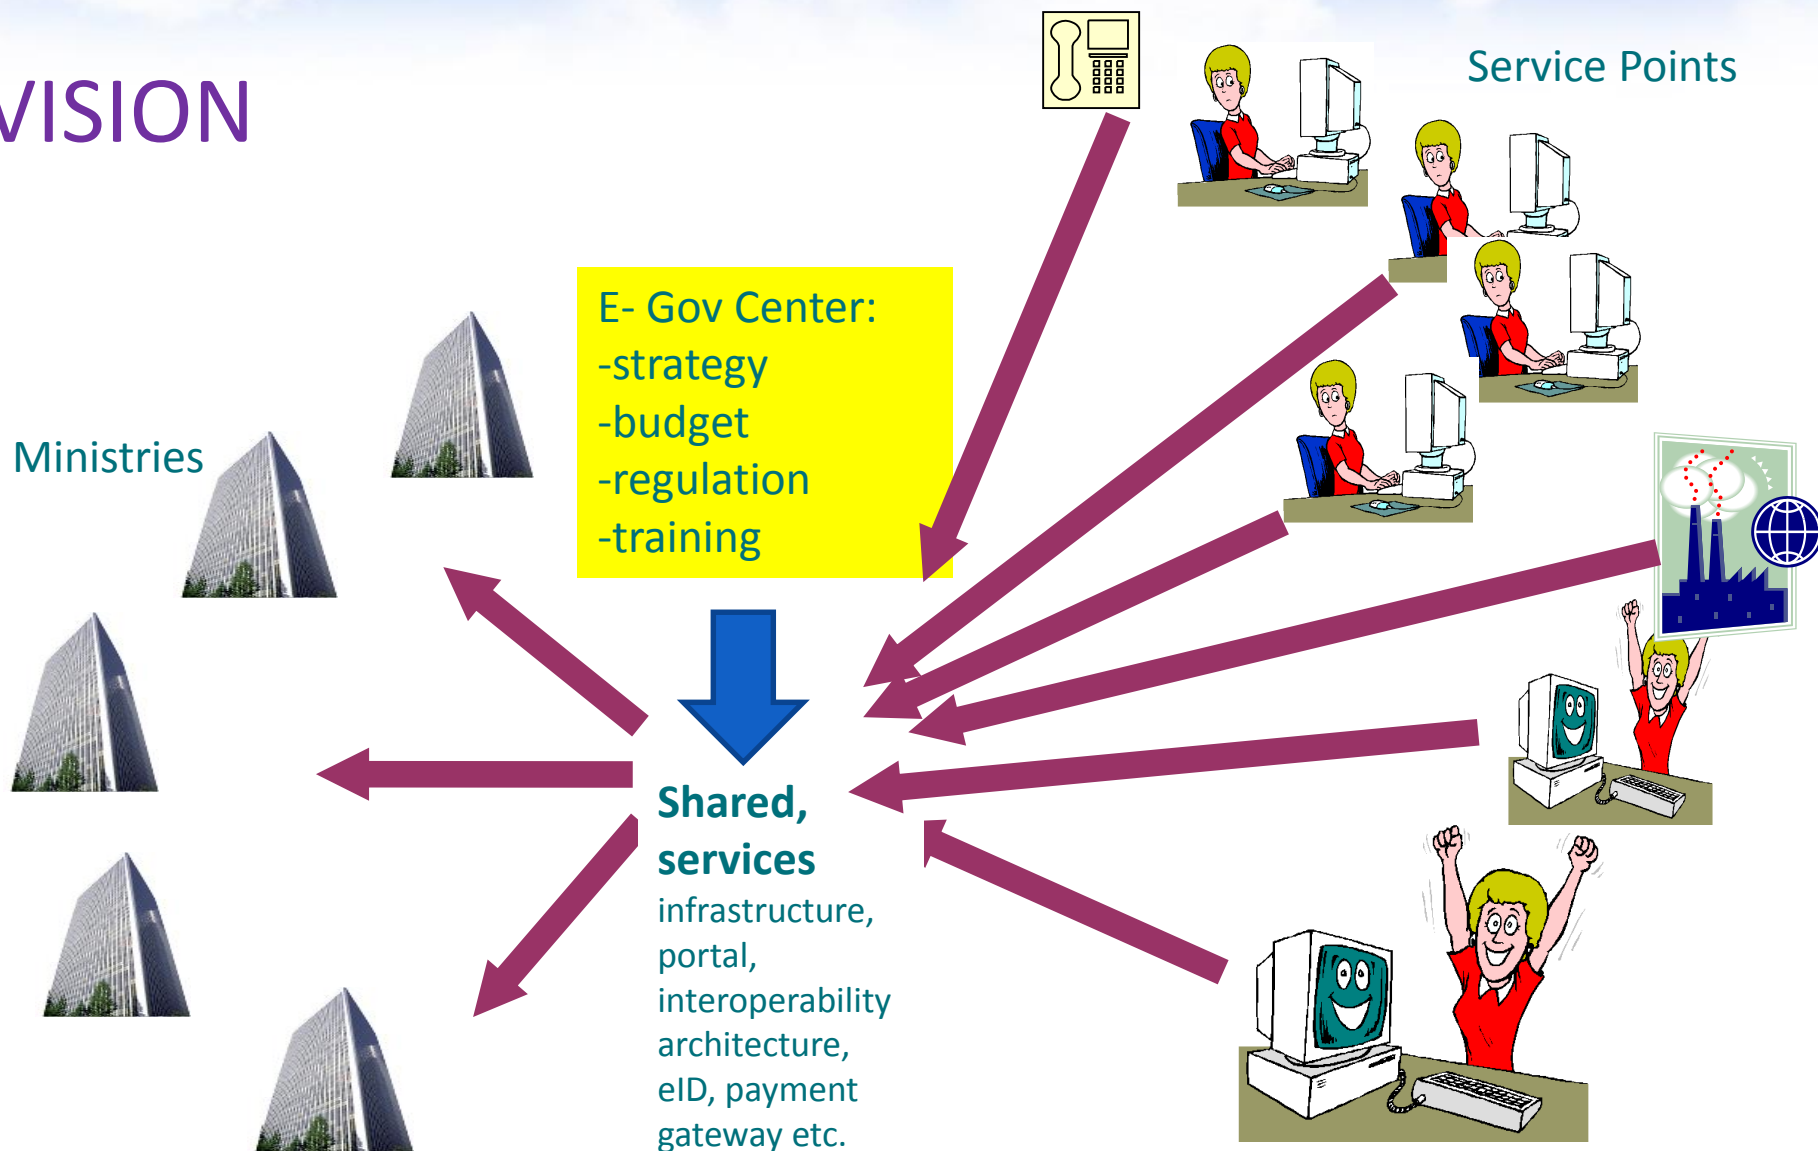

Governmental Registries

- Many registries, all very different, managed and developed by different organizations and financed separately
- Very many users, most of them are very small organizations without security knowledge and with a very small IT budget
- Very high security requirements. Registries contain personal data that is in some cases used to make high value decisions and in some cases needed in real time

VISION

Heterogeneous environment:

different operating systems, authentication and access methods

Unified security environment:

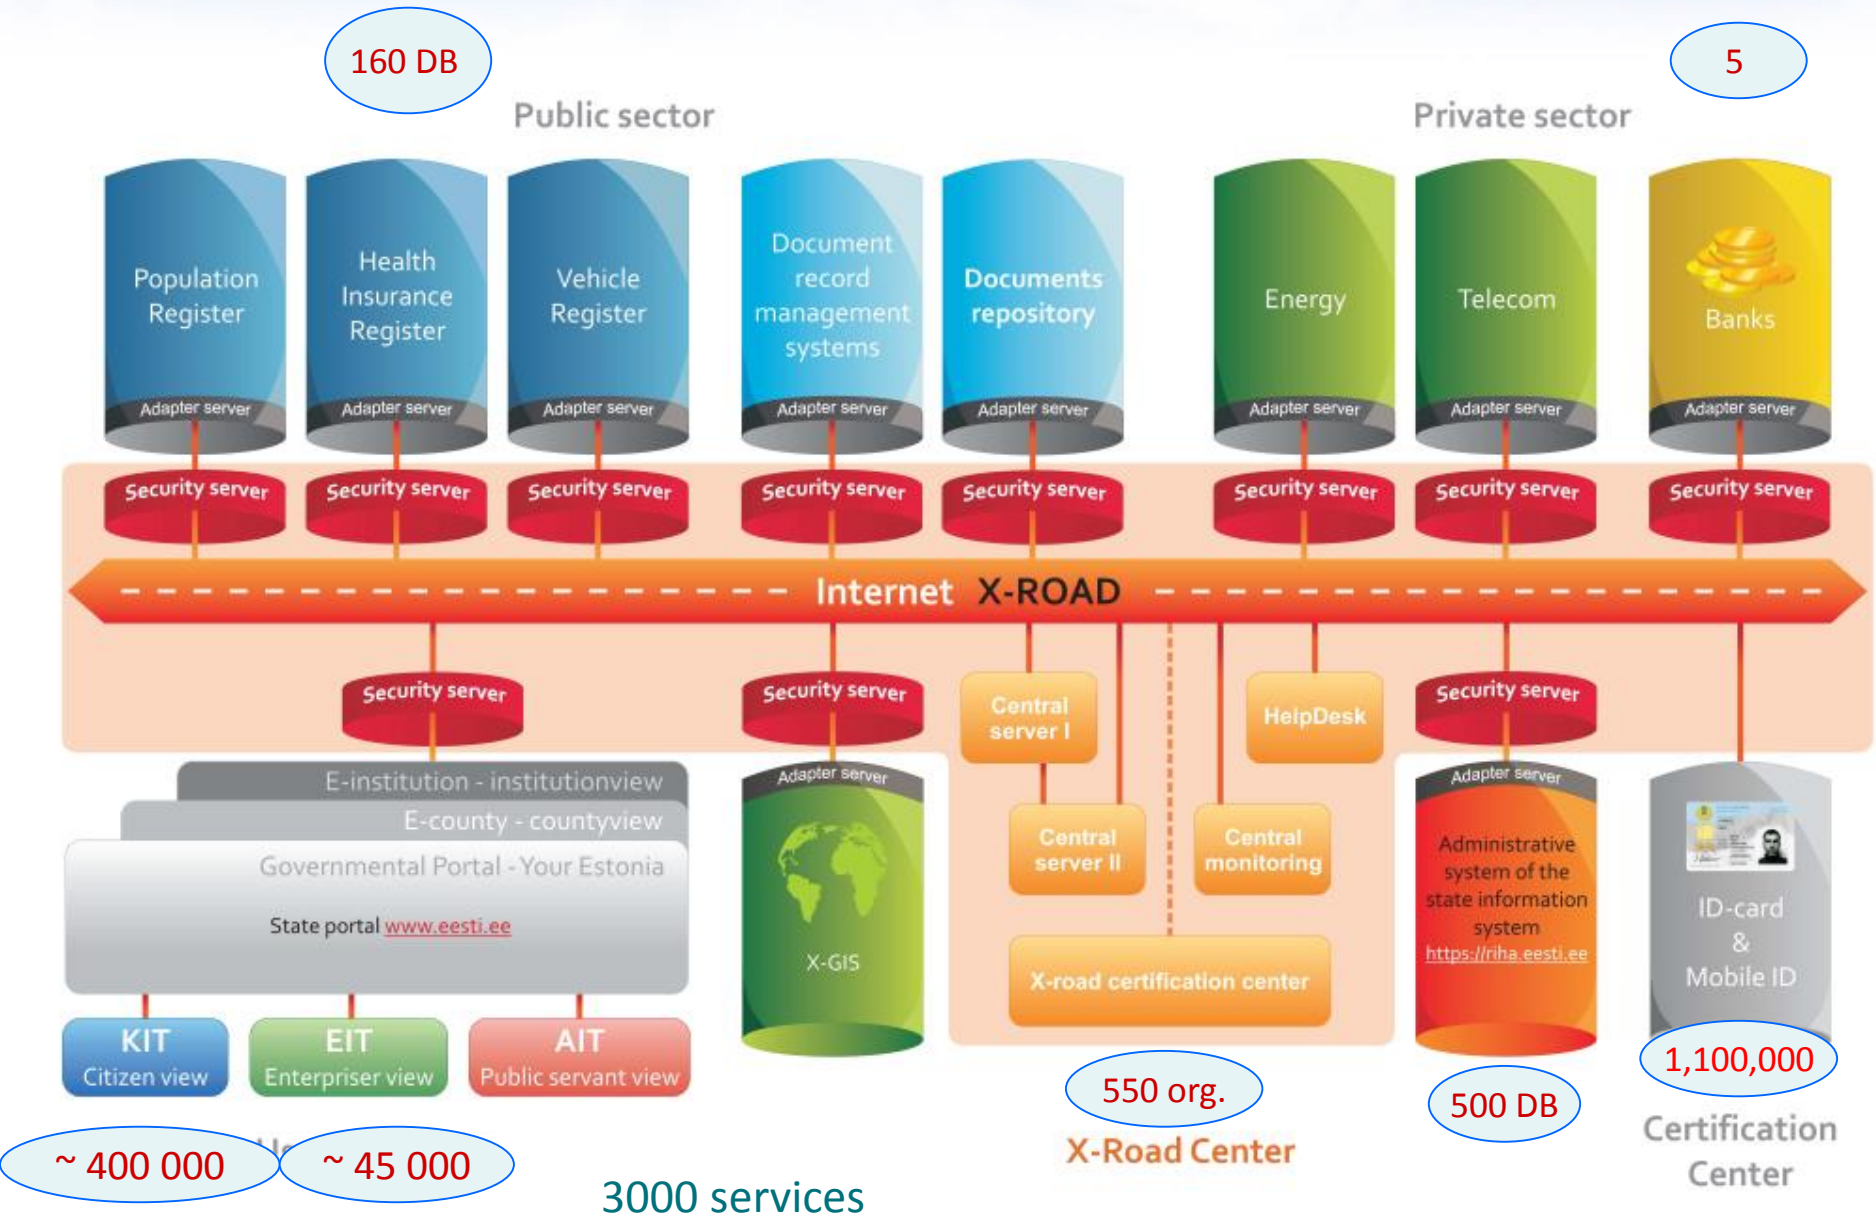

- Confidentiality, integrity, availability and non-repudiation in a unified way
- Single protocol and single interface (XML-RPC)

Heterogeneous environment:

different database systems, technologies, protocols and interfaces

X-Road Estonia

REMOTE ADMINISTRATION & SUPPORT

Support & administration services
Initial Installation and localization
Training
Operating of CA

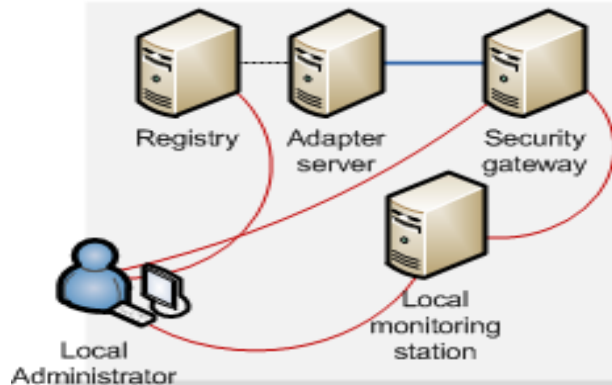

INTEGRATION LAYER

LOCAL PARTNER

OPERATION: SUPPORT, MONITORING, TRAINING, ADMINISTRATION

REGISTRY 1

REGISTRY 2

Operates local organization:
- Local policies
- Training
- Validation
- User support
- User administration of Portals

National chip-based Identity Card

Issuing authority:

Estonian Citizenship and
Migration Board

Service contractor:

TRÜB Switzerland

Start of issue: January 1, 2002

Conformance with:

ICAO Doc. 9303 part 3

Inside 16 Kb RSA crypto chip are :
2 private keys; authentication certificate;
digital signature certificate;
personal data file

Thank You!
